SUMMARY

Hi, I am Tien. I graduated in 2025 at Duy Tan University. I have a solid understanding of the Java programming language and more than 1 year of real project experience working with Selenium Framework using Java. My goal is to become a professional Test Engineer, contribute to innovative projects and bring real value to the community through communication and skills. I am willing to face new challenges and constantly strive to be part of future progress and success.

EXPERIENCE

Automation Engineer 10/2024 - 02/2026
株式会社AGEST(アジェスト) Da Nang, Viet Nam

- Implemented a robust Selenium WebDriver-based framework, resulting in a reduction in manual testing effort.
- Supporting team members, which increased team more productivity.
- Helped maintain QA documentation to support knowledge sharing and onboarding of new team members.
- Collaborated with members and QA teams to identify and report bugs, ensuring software quality.
- Gained hands-on experience with test automation tools such as Selenium, TestNG, or JUnit.
- Learned and applied best practices in test automation and software testing methodologies.

PROJECTS

Satofuru 10/2024 - 04/2025
Japan

Satofuru is an e-commerce project that allows users to browse products, shop online, and make payments directly through the website.

- Team size: 6 members
- Role: Automation Test Engineer (read test cases, implement them and maintain the scripts, report bugs, ...)
- Technologies: Selenium, TestNG, Allure report, ...

ELSwifTest 06/2025 - 11/2025
USA

ELswifTest is a finance and distribution management project that allows users to manage their receipts related to these areas.

- Team size: 10 members
- Role: Automation Test Engineer (read test cases, implement them and maintain the scripts, report bugs, ...)
- Technologies: Dimesion SwifTest of Oracle, ...

KEY ACHIEVEMENTS
